

PREFACE

International Polish-Slovak Workshop on Advanced *in Vitro* Study of Plant and Fish Oil in Ruminants was organized by Department of Animal Nutrition and Feed Management, The August Cieszkowski Agricultural University in Poznań, May 25th, 2006, Poland. The workshop was designed for Polish and Slovak scientists working on rumen fermentation processes *in vitro* using rumen simulation system Rusitec.

The papers review strategy for feeding fat to ruminants and its more effective utilization in the rumen. The workshop provided the opportunity to exchange experience and discuss prospects for joint future research program.
